DETAILED ACTION

Allowable Subject Matter

1. Claims 1-20 are allowed.
2. The following is an examiner's statement of reasons for allowance: References such as Hagerman et al. (US Pat. 6,380,854 B1), Ellul, Jr. et al. (US Pat. 6,133,839), and Ellwood et al. (US Pat. 5,670,946) disclose smoke detectors that include a testing device for the smoke detector. Specifically, each disclose a testing device that remotely transmits and receives signals from the detector to determine whether the smoke detector is working properly. However, neither of these references nor any other prior art of record disclose separately or in combination the claimed smoke detector comprising a smoke detecting chamber for sensing smoke particles; the smoke detector having electrical circuitry, including a coil, used when an alarm signal is produced; an input receiver for initiating a test in response to a test signal being received; an evaluation arrangement for determining operating characteristics of the operating circuit which vary over time; a controller for reporting the determined operating characteristics of the smoke detector in response to a test signal being received, the controller coding a pulsed signal with the determined operating characteristics and using the coded pulsed signal to drive the electrical coil, the coded pulsed signal causing the electrical coil to produce a coded low power RF signal which includes the determined operating characteristics, the coded RF signal being receivable within a short distance of the smoke detector.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. The prior art of record and not relied upon is considered pertinent to the applicant's disclosure as follows. Morris (US Pat. 6,323,780 B1), Pepper (US Pat. 6,423,962 B1), and Andres et al. (US Pat. 6,522,248 B1), which disclose smoke detectors with testing devices.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Davetta W. Goins whose telephone number is 571-272-2957. The examiner can normally be reached on Mon-Fri with every other Fri. off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Daniel Wu can be reached on 571-272-2964. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
